IWF Holland is a wholesale food trader. We have traveled around the world for the past 20 years visiting countries, from China to Africa looking for new products and analyzing the production processes up close. With our knowledge of food, we assure to have chosen the best products.

IWF Holland sells authentic products from famous brands and carries its own quality brand: Golden Lake. We are proud to say that Asian, Turkish and African supermarkets, as well as restaurants and wholesalers in the Netherlands, Belgium and Germany order their quality products from the wholesaler in the north.

We choose the best products and are mindful that these products were produced under good working conditions. IWF Holland does not claim to be the cheapest wholesaler but we guarantee the very best quality.

As an international food trader, IWF Holland is constantly launching new brands from different countries.

Home

A detailed photograph of a spice market stall. The background is filled with wooden shelves holding numerous glass jars of various sizes, each containing different colored powders and granules. Above the shelves, large bundles of dried herbs and leaves hang from the ceiling, creating a lush, textured canopy. In the foreground, a variety of spices are artfully arranged. Several large, conical mounds of bright yellow, orange, and red powders sit in metal and ceramic containers. Interspersed among these are woven baskets and small bowls filled with whole spices, including dark brown peppercorns, bright pink and yellow flower petals, and small, round, light-colored seeds. Bundles of cinnamon sticks and other dried botanicals are also visible. The overall scene is rich in color and texture, showcasing a wide array of aromatic ingredients.

MILK PRODUCTS

Roi Thai Coconut Milk.

Roi Thai is produced using highly technological methods employing Ultra High Temperature (UHT). This method works by using 140°C of heat for just four seconds and thereby destroying enzymes and microorganisms while maintaining the fresh and original taste. It is then filled in five-layer coated paper boxes for a germ-free environment.

Roi Thai can be kept for 18 months by room temperature.

No preservatives added. (16 - 18% Fat)

DRINKS & BEVERAGES

Germinated Brown Rice (GBR) is different from normal brown rice in that it has undergone the process of germination or 'sprouted brown rice'. During the process of germination. The nutrients which have increased significantly include GABA, lysine, vitamin E, dietary fiber, niacin, magnesium, vitamin B1, and vitamin B6 the amount of GABA was noted to be ten times more as compared to milled white rice and two times more than that of brown rice. The increasing of GABA is considered to be a chief inhibitory neurotransmitter within the body and helps in preventing Alzheimer's disease, "V-fit Brown Rice Milk" is made from organic germinated brown rice. The brown rice has undergone germination process in a controled environments before processed to rice milk under aseptic condition.

"V-fit Brown Rice Milk" is fresh,silky, delicious cereal drink. It is non dairy and therefore lactose free. It is perfect to replace dairy milk in every recipe.

We have two version of "V-fit Brown Rice Milk"

"V-fit Brown Rice Milk" original

"V-fit Brown Rice Milk" with a minimum amount of added sugar
